Submitted Code: 2 weeks, 3 days ago

Language: python

[Edit Code](#)

```
1 class Solution(object):
2     def reverseString(self, s):
3         """
4         :type s: List[str]
5         :rtype: None Do not return anything, modify s in-place instead.
6         """
7
8         index = len(s)/2
9         for i in range(index):
10             s[i], s[-1-i] = s[-1-i], s[i]
11
12         return s
```
